

NASA SEWP VI

Solutions for Enterprise-Wide Procurement
CONTRACT HOLDER - CATEGORY C

SEWP OVERVIEW

NASA SEWP VI - the NASA Solutions for Enterprise-Wide Procurement program - provides Information Technology, Communication and Audio-Visual (ITC/AV) solutions and services for Federal agencies and approved contractors. SEWP is a Government-Wide Acquisition Contract (GWAC) managed by NASA and has evolved since its creation in 1993 to address changing Federal technology needs. SEWP VI is organized into three scope categories: Category A - ITC/AV Solutions; Category B - Enterprise-Wide ITC/AV Service Solutions; and **Category C - Mission-Based ITC/AV Service Solutions**. Global Commerce and Services, LLC (GCS) is a Category C prime contract holder.

FAIR OPPORTUNITY

FAR 16.505(b)(1) provides that each contractor shall be given a fair opportunity to be considered for orders exceeding the applicable threshold under a multiple-award contract, subject to the exceptions and procedures in the FAR. The Contracting Officer determines the appropriate fair-opportunity method and documents the basis for order placement and price.

The SEWP online Quote Request Tool (QRT) is the recommended method for supporting fair opportunity and acquisition documentation. The QRT can include contract holders within the selected SEWP VI Category or based on a suggested source.

ABOUT GLOBAL COMMERCE AND SERVICES, LLC

Founded in 2000, Global Commerce and Services, LLC (GCS) is a Federal services company delivering information technology, cybersecurity, engineering, program management, and mission support services to defense and civilian agencies. GCS is an SBA-certified HUBZone and Woman-Owned Small Business with an ISO 9001:2015-certified Quality Management System.

WHAT IS IN SCOPE FOR SEWP VI?

SEWP VI is designed to provide a broad suite of ITC/AV solutions and services. The program is structured so contract holders can address evolving commercial technology and IT service requirements within their awarded scope. For an official scope determination, customers may submit a requirement overview and/or bill of materials to help@sewp.nasa.gov.

CATEGORY A ITC/AV Solutions	CATEGORY B Enterprise-Wide ITC/AV Service Solutions	CATEGORY C Mission-Based ITC/AV Service Solutions GCS Awarded Category
---------------------------------------	---	--

HOW TO OBTAIN A GCS QUOTE

Customers should use the NASA SEWP Quote Request Tool (QRT) when appropriate and include GCS under Category C. For GCS quote coordination, requirement questions, or assistance responding to a QRT request, contact **David Harmon, Program Manager**, at contracts@globalcommserv.com or **504-308-1308**. Provide the solicitation/QRT reference, statement of work or performance work statement, requested period of performance, place of performance, applicable security or staffing requirements, and requested response date when available.

GCS will review the request for alignment with its awarded SEWP VI Category C scope and provide the requested technical and pricing response through the applicable SEWP process.

ORDERING PROCESS

Each agency establishes its internal process and forms for Purchase Requests (PRs) and Delivery Orders (DOs). Typically, the end user develops the requirement and PR, including required funding information, and sends it to the agency procurement office. The issuing agency - not the NASA SEWP Program Management Office (PMO) - issues the DO. The SEWP PMO reviews, processes, and tracks issued DOs and forwards them to the appropriate contract holder.

The issuing agency Contracting Officer is responsible for complying with agency-specific policies applicable to orders placed under existing contract vehicles and GWACs. Any modification to a SEWP order must also route through the SEWP PMO.

INSTALLATION, WARRANTY, TECHNICAL & SOFTWARE SUPPORT

GCS will provide installation, technical support, software support, warranty support, and other post-delivery services when those requirements are included in the applicable delivery order. The specific service levels, warranty terms, acceptance requirements, and support procedures will be governed by the delivery order and incorporated contract terms. Customers should direct post-delivery questions to contracts@globalcommserv.com or **504-308-1308**. GCS will coordinate the appropriate technical, program, or contract resource for resolution.

PROBLEMATIC ORDERS & ESCALATION

For an order issue, provide the SEWP delivery order number, issuing agency, a brief description of the issue, the affected deliverable or service, and the requested resolution date. Contact **David Harmon, Program Manager**, at contracts@globalcommserv.com / 504-308-1308. Contractual or unresolved issues may be escalated to **Joaneane Smith, Contract Manager**, through the same GCS contracts contact channel. GCS will document the issue, coordinate corrective action, and communicate status through resolution. NASA SEWP program assistance is also available at help@sewp.nasa.gov or **(301) 286-1478**.
